## PROJECTS

---

**Cat Nanny Express** | <https://github.com/ashleysouvannaraj/Cat-Nanny-Express> | <http://cat-nanny-express.surge.sh/>

- An interactive single player game allowing users to become a pet nanny and score the highest possible score
- Web application utilizes Google Fonts API for a consistent user experience as well as Dog and Cat APIs which randomly generates images of those animals on the screen.
- All user data is stored in and retrieved from a backend as a service API, Firebase
- Application was built in a team of three where my primary responsibility was creating the Game Over page and implementing Firebase to display the top ten user scores.

**GitWise** | <https://github.com/ashleysouvannaraj/GitWise> | <https://gitwise.herokuapp.com/>

- Utilizes GitHub's API to enhance your searching experience through their repositories.
- Used GraphQL to pull data from GitHub
- Stored all recent activities in Firebase to render on user page.
